

SAVAKROTH LEAV

PENETRATION TESTER

Phnom Penh Cambodia • +855 92 517 203 • savakroth17@gmail.com

Cybersecurity Professional with a strong interest in ethical hacking, penetration testing, vulnerability analysis, and network security. Hard-working, energetic, passionate and technical-minded individual. Possess exceptional communication and collaboration skills with ability to multitask and resolve problems quickly. I aimed to use my abilities to contribute to stopping cyber criminals and protecting digital assets and expand Cambodia digital excellence across SEA.

EXPERIENCE

Offensive Security Intern, Ministry of Post and Telecommunications May 2025 - July 2025

- Performed penetration testing and vulnerability assessments on over 10+ digital assets including web servers, web applications, and network infrastructures of MPTC.
- Followed systematic approach and efficient framework such as cyber kill chain and penetration testing life-cycle to conduct black box testing and discovered over 30+ weaknesses and 10+ CVEs with tested attack vectors.
- Assisted in preparing technical reports outlining findings, threat levels, risks, and remediation recommendations for internal stakeholders.

PROJECTS

Red Hat Phishing Simulation Web Tool Aug 2025 - Dec 2025

- Designed and developed a phishing simulation tool to emulate real-world phishing campaigns for security awareness testing.
- Created and deployed 20+ simulated phishing emails (credential harvesting, malicious links, attachment-based lures) targeting test users.
- Tracked and analyzed user interactions, achieving open, click, and credential submission metrics to identify high-risk behaviors.
- Generated automated reports summarizing phishing success rates, user susceptibility levels, and recommended awareness improvements.

Network Intrusions Detection System Web Tool Sep 2024 - Nov 2024

- Led a team of 5 members in developing a Python-based Network Intrusion Detection System (NIDS) designed for home networks and small businesses.
- Captured and analyzed real-time network traffic using scapy, detecting anomalies in TCP, UDP, and ICMP packets with an accuracy of 85-90%.
- Implemented machine learning-based intrusion detection, processing over 10,000+ data packets for threat classification.

EDUCATION

American University of Phnom Penh Phnom Penh, Cambodia

- Bachelor of Science in Cyber Security | **GPA: 3.77** Expected May 2026

Currently Pursuing

- HackTheBox Certified Penetration Testing Specialist (HTB CPTS) Expected Aug 2026

SKILLS

- Proficient in scripting language such as Bash, Python and Javascript for automation and exploiting
- Skilled in penetration testing tools such as Kali Linux, Nmap, Burp Suite, Metasploit, Bloodhound...
- Highly-trained on medium-to-large scale web application vulnerabilities and exploiting techniques
- Neat and detailed-oriented report writing ability during post exploitation
- Great networking and hardware knowledge for network infrastructure penetration testing

COMPETITION ACHIEVEMENTS

- KE Unipreneur National Challenge 2nd Runner Up **December 2024**
- KE Unipreneur Camp Season 2 Cluster 1 Champion **July 2024**
